

Wednesday, September 6

period	Session Chair	Presenting Author	Presentation Title	Room
9:00-10:00	Francisco Saldanha-da-Gama	Martine Labbé	Stackelberg games and bilevel bilinear optimization problem	3.2.14
15:15-16:15	Luís Gouveia	Giovani Rinaldi	Quadratic Unconstrained Binary Optimization: some exact and heuristic approaches	3.2.14

Thursday, September 7

period	Session Chair	Presenting Author	Presentation Title	Room
9:00-10:00	Fernando Fontes	Marco Campi	Scenario optimization: how far can we trust data-based decisions?	3.2.14
15:15-16:15	Paula Amaral	Immanuel Bomze	On gaps and dots - duality and attainability in conic optimization	3.2.14

Friday, September 8

period	Session Chair	Presenting Author	Presentation Title	Room
9:00-10:00	Domingos Cardoso	Jacek Gondzio	Continuation in optimization: from interior point methods to big data	3.2.14
13:50-14:50	Luís Nunes Vicente	Donald Goldfarb	Quasi-Newton methods: block updates, adaptive step sizes, and stochastic variants	3.2.14
